Portfolio: <https://ridhan-portfolio.vercel.app/>

PROFESSIONAL SUMMARY

Data Scientist and Data Analyst with 4+ years of experience using Python, SQL, statistical inference, and machine learning to turn ambiguous business questions into testable analyses and predictive models. Built reproducible classification and experimentation workflows using XGBoost, scikit-learn, MLflow, and agentic AI tools including Codex and Claude Code. Evaluated acquisition performance across 6,000 prospects, finding statistically significant conversion lift but a EUR 1.08 margin decline that changed the launch recommendation.

TECHNICAL SKILLS

Machine Learning and Statistics: Python, scikit-learn, XGBoost, Random Forest, Logistic Regression, Predictive Modelling, Classification, Regression, Feature Engineering, Model Evaluation, Model Deployment, MLflow, SHAP, Explainable AI, Statistical Inference, Hypothesis Testing, Statistical Significance, Confidence Intervals, Experimentation, Root-Cause Analysis, Class Imbalance Handling, SMOTE

Data Engineering and Analytics: SQL, Pandas, NumPy, PostgreSQL, MySQL, SQL Server, dbt, Data Cleaning, Data Transformation, Data Validation, EDA, SQL Joins, CTEs, Window Functions, Views, Jupyter Notebook

Marketing and Business Analytics: Campaign Performance Analysis, Acquisition Channel Analysis, Conversion Analysis, Predictive Scoring, KPI Dashboards, Business Intelligence, Data Storytelling

Agentic AI and Automation: Codex, Claude Code, Cursor, Agentic AI-Assisted Development, Manual AI Output Verification, Prompt Workflows, Workflow Automation, Reporting Automation, AI-Assisted Analysis

Visualisation and Reporting: Power BI, Looker, Looker Studio, Tableau, Streamlit, Plotly, Matplotlib, Seaborn, Excel, Google Sheets, Interactive Dashboards

Cloud, Software and Delivery: Google Cloud Platform, Vertex AI, Docker, Git, GitHub, Cross-Functional Collaboration, Process Documentation

Additional Machine Learning: PyTorch, TensorFlow, LLM-Based Workflows

Languages: English C2, Latvian A1

PROJECTS

Baltic Commerce Intelligence | Campaign Experimentation and Acquisition Analytics

Tech: Python, SQL, dbt, SQLite, Excel, GitHub Actions

GitHub: <http://github.com/RidhanPar/baltic-commerce-intelligence>

- Evaluated a randomized offer across 6,000 prospects, finding a statistically significant 3.76-point conversion lift but a EUR 1.08 margin decline.
- Investigated campaign performance across traffic sources, identifying profitable CRM and Organic Search growth and a high-conversion Paid Search channel that lost EUR 3,000.
- Built a reproducible Python, SQL, and dbt pipeline with 19 automated tests, confidence intervals, hypothesis testing, and an executive decision memo.

DirectDebit IQ | Predictive Scoring and Analytics Platform

Tech: Python, SQL, XGBoost, scikit-learn, MLflow, SHAP, SQLite, dbt, Plotly, Streamlit, Docker

Live demo: <https://directdebit-iq.streamlit.app/>

GitHub: <https://github.com/RidhanPar/directdebit-iq>

- Built an XGBoost scoring model across 50,000 payment records, reaching 94.5% recall for high-risk outcomes.
- Engineered predictive features and compared ROC AUC, average precision, F1, precision, and recall to distinguish signal from noise.
- Used SHAP and MLflow to explain model outputs, document limitations, and communicate model-choice trade-offs.

Customer Support Intelligence Platform | Behavioral Risk Scoring

Tech: Python, scikit-learn, Random Forest, Pandas, Plotly, Streamlit

Live demo: <https://customer-support-intelligence-platform.streamlit.app/>

GitHub: <https://github.com/RidhanPar/customer-support-intelligence-platform>

- Built a Random Forest classification workflow that scores SLA-breach risk using behavioral and operational signals including priority, channel, ticket age, and escalation status.
- Converted predicted probabilities into risk tiers and recommended actions, supporting structured prioritization and operational decision-making.
- Delivered an interactive monitoring dashboard with model evaluation, filtering, and downloadable prediction outputs.

PROFESSIONAL EXPERIENCE

ALIEF MAJU ENTERPRISE (M) SDN BHD | Gua Musang, Malaysia (Remote) | Jul 2021 – Present

Data Analyst

- Built Python and SQL pipelines that cleaned and validated 500+ records, reducing manual reporting time by 50%.
- Automated SQL checks and reusable Python workflows, saving 4+ hours per monthly reporting cycle.
- Used Codex and Claude Code for agentic AI-assisted development, cutting script-development time by around 60% while manually validating outputs.
- Built Power BI and Looker dashboards that translated sales, stock, and operational data into management decisions.
- Investigated recurring data-quality issues across 3 business datasets, preventing missing values, duplicates, and format errors before reporting.

TELUS Digital | Riga, Latvia | Nov 2024 – May 2026

Senior Product Specialist

- Handled and analysed 500+ weekly cases covering advertising accounts, billing problems, and platform bugs using knowledge-base guidance and backend tools.
- Investigated recurring case patterns and root causes across advertising, billing, and platform workflows, then reported operational insights to operations.
- Built weekly KPI and issue-pattern reports that highlighted performance trends, knowledge gaps, and action priorities.
- Worked with product, quality, and operations teams to validate findings, clarify escalations, and improve case-handling processes.

Demola Global | Riga, Latvia | Sep 2023 – Dec 2023

Technical Specialist Intern

- Collected and structured feedback from 100+ students, supporting user-needs analysis within a 3-month project cycle.
- Documented requirements and validated outputs with an international team, supporting on-time delivery across the full project.

EDUCATION

Master of Business Administration

Riga Nordic University, Riga | June 2026 – Present | Expected graduation: 2028

Master of Engineering Science in Computer Science and Informatics

Riga Nordic University, Riga | May 2024 – June 2026 | credits: 120 ECTS

Bachelor of Engineering Science in Computer System

Riga Technical University, Riga | Jan 2021 – Jan 2024 | Credits: 180 ECTS

CERTIFICATIONS

Google Data Analytics Professional Certificate — Google Career Certificates | 2025

- Gained hands-on experience in SQL, R, Tableau, Google Sheets, and real-world business analysis scenarios

Data Visualization with Python — IBM via Coursera | Dec 2024

- Built interactive dashboards and visual narratives using Matplotlib, Seaborn, Plotly, and Folium.

CONFERENCE PAPER

A Web Based Student Performance Prediction Platform Using Educational Data Mining | **68th ESReDA Seminar 2026**

AWARDS AND ACHIEVEMENTS

Above & Beyond Award – Q4 2025 | TELUS Digital

Recognized for outstanding performance, innovation, proactive problem-solving, and contribution of creative solutions beyond standard responsibilities.

Above & Beyond Award – Q2 2025 | TELUS Digital

Awarded for exceptional dedication, results-driven performance, and proactive contribution to team and organizational goals.

Two-time recipient within 2025 (Q2 and Q4) — consistent high performer recognized across both roles.

1st Place Winner – Mobility City Challenge 2022 Hackathon | Riga Airport & University of Latvia
